Topic: AVERAGE

1. In the first 8 overs of a cricket game, the run rate was only 4.5. What should be the run rate in the remaining 42 overs to reach the target of 309 runs?
   A. 6.25 B. 6.5 C. 6.75 D. 7
2. The average age of A, B and C is 27 years. If the average age of B and C is 29 years, what is the age of A in a year?
   A. 25 years B. 24 years C. 23 years D. 22 years
3. The average age of husband and wife is 27 years. Five years hence, the average age of the husband, wife and child is 22 years. The age of child is
   A. 1 years B. 2 years C. 3 years D. 4 years
4. Average weight of 21 students is 32 kg. If the average weight increases by 0.5 kg when Suresh, one of the students leaves the group, what is the Suresh's weight?
   A. 20 kg B. 21 kg C. 22 Kg D. 23 Kg
5. The average monthly income of a family of four earning members was Rs. 25000. One of the daughters in the family got married and left home, so the average monthly income of the family became Rs. 26090. What is the monthly income of the married daughter?
   A. 25640 B. 22630 C. 30000 D. 21730
6. The average of five consecutive numbers is 36. The highest of these numbers is:
   A. 38 B.37 C. 36 D. 35
7. There were 35 students in a hostel. Due to the admission of 7 new students the expenses of the mess were increased by Rs.42 per day while the average expenditure per head diminished by Re 1. What was the original expenditure of the mess?
   A. Rs 540 B. Rs 500 C. Rs 460 D. Rs 420
8. The average salary of all the workers in a workshop is Rs.11000. The average salary of 11 technicians is Rs.15000 and the average salary of the rest is Rs.8800. The total number of workers in the workshop is:
   A. 30 B.31 C.32 D.28
9. A library has an average of 510 visitors on Sundays and 240 on other days. The average number of visitors per day in a month of 30 days beginning with a Sunday is
   A. 420 B. 315 C. 300 D. 285
10. A student's mark was wrongly entered as 75 instead of 57. Due to that the average marks for the class got increased by one third. What is the number of students in the class?
   A.18 B. 36 C. 54 D. 72

Topic: LCM & HCF

1. A number when divided by 238 leaves a remainder of 79. What will be the remainder when the number is divided by 17?
   A. 8 B. 9 C. 10 D. 11
2. A number when divided by 21 leaves a remainder 7. The same number when divided by 14 leaves a remainder n. How many values can n take?
   A.0 B. 1 C. 2 D.3
3. Find the greatest number that will divide 208, 222 and 264 so as to leave the same remainder in each case.
   A. 5 B.6 C.7 D.8
4. Five bells commence tolling together and toll at intervals of 3, 6, 9, 12 and 15 seconds respectively. In 30 minutes, how many times do they toll together?
   A. 10 B.11 C.12 D. 13
5. In GovinddevJi temple there are some magical bells which toll 24 times in a day, simultaneously. But every bells tolls at a different interval of time, but not in a fraction of minutes. The maximum number of bells in the temple?
   A. 8 bells B. 10 bells C. 12 bells D. 14 bells
6. Let N be the greatest number that will divide 12199, 13117 and 17153, leaving the same remainder in each case. Then sum of the digits in N is:
   A. 10 B.15 C.20 D.25
7. The HCF of two numbers is 27 and their LCM is 1512. If one of them is 189 then the other number is?
   A. 1 B. 27 C.216 D.1512
8. The greatest number of five digits which is divisible by 12, 15, 24 and 72 is:
   A.99360 B. 99720 C. 99820 D. 99900
9. The sum of two non co–prime numbers added to their HCF gives us 187. How many such pairs are possible?
   A. 6 B.7 C. 8 D. 9
10. 6 different sweet varieties of count 38, 76, 133, 209, 247, 190 were ordered for a particular occasion. They need to be packed in such a way that each box has the same variety of sweet and the number of sweets in each box is also the same. What is the minimum number of boxes required to pack?
    A. 57 boxes B. 19 boxes C. 51 boxes D. 47 boxes
11. LCM of 2 natural numbers p and q where p > q is 1001. What is the maximum possible sum of the digits of q?
    A.2 B.8 C.10 D.14
12. A man has certain number of small boxes to pack into parcels. If he packs 13, 14, 15 or 16 boxes in parcel, he is left with seven over; if he packs 17 in a parcel, none is left over. What is the number of boxes he may have to pack?
    A. 2723 B. 2730 C. 2737 D. 2731
13. A Number when divided by 10 leaves a remainder 9, when divided by 9 leaves a remainder of 8, when divided by 8 leaves a remainder of 7…… when divided by 2 leaves a remainder of 1. Determine the number.
    A. 31 B. 1029 C. 2519 D. 1679
14. The ratio of two numbers is 11: 13. If their LCM is 1001, then the difference of numbers is:
    A. 13 B. 39 C. 52 D. 143
15 Find the greatest 6-digit number, which when divided by 8, 12, 15 and 20 leaves 5, 9, 12 & 17 as remainders respectively.
    A. 9,99,977 B. 9,99,963 C. 9,99,997 D. 9,99,957

Topic: MIXTURE & ALLIGATION

1 There was 40 litre milk in a bucket. 4 litre liquid of the bucket was replaced by water. This process was repeated two times again. Find the quantity of milk in the bucket at last.

A. 18 lit B. 24.53 lit C. 32.56 lit D. 29.16 lit

2 In what ratio must water be mixed with milk to gain $16\frac{2}{3}$% on selling the mixture at cost price?

A. 1:6 B. 6:1 C. 2:3 D. 3:2

3. In what ratio must a grocer mix two varieties of tea worth Rs. 60 a kg and Rs. 65 a kg so that by selling the mixture at Rs. 68.20 a kg he may gain 10%?

A. 3:2 B. 3:4 C. 3:5 D. 4:5

4. A shopkeeper has 50 kg of rice. A part of which he sells at 10% profit and remaining at 5% loss. He gains 7% on the whole. Find the quantity sold at 10% profit.

A. 15 kg B. 20 Kg C. 35 Kg D. 40 kg

5. The cost of Type 1 rice is Rs. 30 per kg and Type 2 rice is Rs. 40 per kg. If both Type 1 and Type 2 are mixed in the ratio of 2 : 3, then the price per kg of the mixed variety of rice is:

A. Rs 34/ Kg B. Rs 35/ Kg C. Rs 36/ Kg D. Rs 37/ Kg

6. A container contain 36 litre of pure milk. First, it is replaced by 6 litre of water, the by 4 liter and lastly by 3 litre. Find the amount of pure milk in container

A. 24 lit B. 24.44 lit C. 25.44 lit D. 25.55 lit

7. In what ratio must a person mix three kinds of metal costing Rs.80/kg, Rs.110/kg and Rs.150 /kg so that the resultant alloy when sold at Rs.138/kg results in a gain of 20%?

A. 1:7:1 B. 1:7:2 C. 2:7:2 D. 2:7:1

8. How many liters of water should be added to a 30 liters mixture of milk and water containing milk and water in the ratio of 7 : 3 such that the resultant mixture has 40% water in it

A. 5 liter B. 7 liter C. 10 liter D. 12 liter

9. A merchant has 1000 kg of sugar, part of which he sells at 8% profit and the rest at 18% profit. He gains 14% on the whole. The quantity sold at 18% profit is:

A. 400 kg B. 560 kg C. 600 kg D. 640 Kg

10. A mixture of 70 litres of wine and water contains 10% water. How much water should be added to make 25% water in the resulting mixture?

A. 1 lit B. 2 lit C. 15 lit D. 14 lit

1	2	3	4.	5.	6.	7	8.	9.	10.

Topic: Number System

1. What is the 899th digit from the right in $(2300)^{449}$?
   A. 0 B. 3 C. 9 D. 1
2. Find the value of |A-B| if 32A4873B is divisible by 72.
   A.3 B.6 C.9 D. 7
3. Numbers A, B, C and D have 49, 50, 51 and 52 factors. Which of these could be a perfect cube?
   A. A and C B. A and D C. A, B and C D. B and D
4. Find the unit digit of the number $(13)^{150}$
   A. 7 B. 9 C. 0 D. 1
5. A number N^2 has 15 factors. How many factors can N have?
   A. 8 or 11 Factors B. 6 or 9 factors C. 8 or 9 factors D 6 or 8 factors
6. Find the unit digit in the expression $(7)^{15}+(15)^7$
   A. 9 B. 8 C. 4 D. 2
7. Find the number of zeros in the 624!
   A.152 B.150 C.154 D.156
8. Find the number of odd factors for the number 2002.
   A. 4 B.8 C. 9 D. 16
9. How many factors of $2^5 * 3^6 * 5^2$ are perfect squares?
   A.42 B. 26 C. 24 D. 52
10. Find the remainder when 8^{80} is divided by 17?
    A. 0 B. 1 C. 2 D.16
11. Find the remainder when 2396×2397×2398×2399 is divided by 24
    A.23 B.22 C.1 D.0
12 What will be the remainder when $33^{33}+33$ is divided by 34.
    A. 1 B. 0 C.32 D. 33
13. Total number of factors of the number 40898 except 1 and number itself.
    A.18 B.16 C. 12 D. 10
14. Find number of zeros for the expression $10^4 * 15^3 * 16^2 * 20^5$?
    A. 12 B.16 C.20 D.22
15. The LCM of first two twin prime number is
    A. 3 B.6 C. 15 D. 35
16. Find the value of X if the number 2378X4310 is divisible by 11.
    A. 3 B. 4 C. 5 D.6
17. Find the unit digit in the number $(17)^{10}$
    A. 7 B. 0 C. 3 D. 9
18. What will be the tens digit in $337 \times 373 \times 349 \times 515 \times 2$
    A. 0 B.7 C. 3 D. 5
19. The numbers 1 to 40 are written side by side as follows: 1234567891011.....3940. If the number is divided by 9, then what is the remainder?
    A. 6 B.4 C.2 D.1
20. The digit by which * is to be replaced so that 37*217 is divisible by 9?
    A.2 B. 7 C. 9 D.3

Topic: PERCENTAGE

1. Find 63.63% of 11099.
   A. 7264 B. 7567 C. 7063 D. 6861
2. If 49% of N is equal to 19% of 539 then N is equal to
   A. 210 B. 211 C.208 D. 209
3. In an examination a student need 36% of marks to pass. Rahul got 323 marks and still gets fail by 19 marks. Find the maximum marks in the examination
   A. 900 B. 950 C. 1000 D. 800
4. Bhuvi takes some flowers in the basket and visits three temples one by one. She offers one half of the flowers from the basket. Id she is left with 9 flowers at the end then, find the number of flowers in the beginning.
   A. 24 D. 36 C. 56 D. 72
5. The difference between the 32% and 25% of a number is 91. Find 3/13 of the number.
   A. 300 B.250 C. 200 D. 150
6. Two students appeared at an examination. One of them secured 18 marks more than the other and his marks was 53% of the sum of their marks. The marks obtained by them are:
   A. 150 & 168 B. 142 & 160 C, 141& 159 D. 140 & 158
7. In an election between two candidates, one got 55% of the total valid votes, 20% of the votes were invalid. If the total number of votes was 75000, the number of valid votes that the other candidate got, was:
   A. 27000 B. 29000 C. 30000 D. 31000
8. A's Salary is 10% more than B's Salary and B's Salary is 10% less than C's Salary. By how much % A's salary is as compared to C
   A. 1% more B. 1% less C. 20% less D. Both salaries are equal.
9. Price of Sugar is increased by 20%. By how much percentage a person should reduce his consumption so that his expenditure remains same.
   A. 20% B. 15% C. $16\frac{2}{3}\%$ D. $66\frac{2}{3}\%$
10. Mr. Naveen Jain donates 15% of his monthly income to charity. This month he gave to charity which is 80% of what he donates every month. What is the monthly income of Mr. Naveen Jain?
    A. Rs. 70000 B. Rs 7000 C. Rs 68000 D. Rs 60000
11. Side of square is increased by 20%. By how much % the area of the square increased.
    A. 20% B. 40% C. 80% D. 44%
12. The value of car is reduced by 25% per year. If the total value decreased in 2 years is Rs 109375 then find the original price of car.
    A. Rs 1,87,500 B. Rs 1,40,625 C. Rs 2,50,000 D. Rs 2,00,000
13. Find the weight of pure gold in 10 gm of 20 carat. It is given that 24 carat gold is cent per cent pure gold.
    A. 9.5 gm B. 8 gm C. 8.33 gm D. 10 gm
14. 35% of the population of a town are men and 40% are women. If the number of children is 20000, find the number of women.
    A. 32000 B. 25000 C. 40000 D. 35000
15. Vedik income is Rs 40000 per month. He saves 11% of his income. If his income is increased by 10% he reduces his savings by 1%, how much does he save now?
    A. Rs 4400 B. Rs 4000 C. Rs 3500 D. Rs 3800

Topic: Problems on Age

1. The sum of ages of 5 children born at the intervals of 3 years each is 50 years. What is the age of the youngest child?
   A. 4 years B. 6 years C. 8 Years D. 10 years
2. The present ages of three persons in proportions 4 : 7 : 9. Eight years ago, the sum of their ages was 56. Find their present ages (in years).
   A. 8,20,28 B. 16.28,36 C. 20,35,45 D. None
3. Vibha's father was 38 years of age when she was born while her mother was 36 years old when her brother four years younger to her was born. What is the difference between the ages of her parents?
   A. 2 years B. 4 years C. 6 Years D. 8 years
4. Q is as much younger than R as he is older than T. If the sum of the ages of R and T is 50 years, what is definitely the difference between R and Q's age?
   A. 1 year B. 2 years C. 25 year D. Data Inadequate
5. A and B are 50 and 70 years old how many years ago was ratio of their ages 2:3
   A. 5 years B. 10 years C. 15 years D. 20 years
6. The average age of A and B is 20 years. If C were to replace A, the average would be 19 and the average age of C and A would be 21. The ages of A, B and C respectively are:
   A. 18,20,22 B. 20,18,22 C. 22,18,20 D. 22,20,18
7. The present age of A is equal to B's age ten years ago. Four years hence, the ratio of the ages of A and B will be 3: 5. Find the present age of A.
   A. 11 years B. 20 years C. 15 years D. 16 years
8. The ratio of the present age of A to that of B is 4: 7. After ten years, the ratio of the ages of A and B will be 3: 4. What will be the ratio of age of A after five years to the present age of B?
   A. 12:7 B. 9:4 C. 13:14 D. 11:6
9. The Present age of Aman and his wife are in the ratio of 7: 6. After two years, the ratio of ages will be 22: 19. At the time of their first child birth, the ratio of their ages was 6: 5. How many years ago did they have the first child?
   A. 5 B. 8 C. 6 D. 7
10. The ratio of the ages of man and his wife is 4:3, After 4 years, the ratio will be 9:7. If at the time of marriage, the ratio was 5:3, how many years ago they were married?
    A. 12 years B. 10 years C. 8 years D. 6 years

Topic: PROFIT & LOSS

1. If selling price is doubled, the profit triples. Find the profit percent.
   A. $66\frac{2}{3}\%$ B. 100% C. 105 % D, 120%
2. A person marks his goods 45% higher than the cost price and allows a discount of 20%. The percentage profit is:
   A. **16**% B. **24**% C. **25**% D. **29**%
3. A Man sells an article at a loss of 15%. If he had received Rs. 33 more, he would have gained 7%. The cost price of the article is:
   A. Rs. 120 B. Rs. 130 C. Rs. 150 D. Rs. 160
4. What is a single discount equivalent to a discount series of 30%, 20% and 10% respectively?
   A. **49.6**% B. **39.6**% C.6**0**% D. **50.4**%
5. The cost price of 30 articles is the same as the selling price of *x* articles. If the profit is 20%, then the value of *x* is:
   A. 35 B. 20 C. 25 D. 15
6. A dishonest shopkeeper professes to sell potatoes at the cost price, but he weighs 930 gm, instead of one kg. What is the % of profit?
   A. 7% B.7.25% C. 7.4% D. 7.53%
7. A shopkeeper increased the price of a product by 50% and later on he reduced the price by 50%. Shopkeeper's loss was:
   A. 0% B. 2.5% C. 25% D. 0.25%
8. A retailer buys 50 pens at market price of 44 pens from a whole seller. He sells these pens giving a discount of 1%. What is profit %?
   A. 10% B. 12.5% C. 7.5% D. 15%
9. The percentage increase in the number of pens sold by a trader from Tuesday to Wednesday is same as the percentage decrease in the number of pens sold from Monday to Tuesday. On Wednesday the trader sold 32 pens more than those he sold on Tuesday. If the percentage decrease in sales from Monday to Tuesday is 20%, how many pens did he sell on Tuesday?
   A. 80 B. 96 C. 112 D. 160
10. A sold a watch to B at a gain of 8%, and B sold it to C at a gain of 4%. If C paid Rs. 1404 for it, the price paid by A was
    A. Rs. 1200 B. Rs. 1250 C. Rs. 1000 D. Rs. 1100
11. I sold 2 washing machines for Rs. 13550 each, one at the loss of 20% and the other at the profit of 20%. What is the percentage of loss or profit resulted from the transaction?
    A. No profit No loss B. 10% loss C. 4% loss D. 4% profit
12. By selling 22 articles, a shopkeeper gains a profit equal to the cost price of 2 articles. What is his profit percentage?
    A. $9\frac{1}{11}\%$ B. $9\frac{1}{9}\%$ C. $11\frac{1}{9}\%$ D. $11\frac{1}{11}\%$
13. A dishonest businessman professes to sell his articles at cost price but uses false weights to cheat the buyers by 10% while buying, and by 10% while selling. Find the profit percentage.
    A. 11.11% B. 15.00% C. 22.22% D. 50.00%
14. A hat vendor bought hats at Rs. 7 per 5 hats. He sold them at Rs. 10 per 6 hats. What was his profit percentage?
    A. 17.04% B. 18.04% C. 19.04% D. 20.04%
15. A man bought three dozen apples. He sold one third of them at the cost price of 10 apples, one third at the price of 12 apples and the remaining one third at the cost price of 15 apples. What is the overall gain or loss per cent?
    A. 2% loss B. 2% gain C. 2.77% loss D. 2.77% gain

Topic: RATIO & PROPORTION

1. The incomes of A & B are in the ratio of 5 :7 & their expenditures are in the ratio of 3 : 5. If each saves Rs.1500. Find the income of B.
   A. Rs 5000 B. Rs 3750 C. Rs 5250 D. Rs 3000
2. A and B together have Rs. 1210. If 4/15 of A's amount is equal to 2/5 of B's amount, how much amount does B have?
   A. Rs 460 B. Rs 484 C. Rs 550 D. Rs 646
3. Two numbers are respectively 15% more than and 15% less than a third number. The ratio of the two numbers is:
   A. 1:1 B. 6: 5 C. 17:23 D. 23:17
4. A sum of money is to be distributed among A, B, C, D in the proportion of 5 : 2 : 4 : 3. If C gets Rs. 1000 more than D, what is B's share?
   A. Rs 2000 B. RS 1500 C. Rs 1000 D. Rs 500
5. Seats for Mathematics, Physics and Biology in a school are in the ratio 5 : 7 : 8. There is a proposal to increase these seats by 40%, 50% and 75% respectively. What will be the ratio of increased seats?
   A. 2:3:4 B. 6:7:8 C. 6:8:9 D. None
6. The sum of three numbers is 413. If the ratio of the first to second is 3:4 and that of the second to the third is 5 : 6, then the third number is:
   A, 105 B.140 C.168 D.59
7. If Rs. 4633 be divided into three parts, proportional to 1/3 :3/4 :4/5 , then the first part is:
   A. Rs 1845 B. Rs 1640 C. Rs1968 D. Rs. 820
8. Two number are in the ratio 3 : 5. If 9 is subtracted from each, the new numbers are in the ratio 12 : 23. The smaller number is:
   A. 27 B.33 C. 49 D. 55
9. In a bag, there are notes of Rs 20, Rs 50 and Rs 100 in the ratio of 10 : 5 : 2. If there is Rs. 6500 in all, how many Rs 50 notes are there?
   A. 50 B. 20 C. 100 D. 30
10. Physics tells us that the weights of objects on the moon are proportional to their weights on earth. Suppose a 180 lb. man weighs 30 lb. on the moon. What is the weight of a boy who weighs 15 lb. on the moon?
    A. 2.5 lb B. 5.0 lb C. 45 lb D. 90 lb
11. If 2A = 3B = 4C, then A : B : C is
    A. 2:3:4 B. 4:3:2 C. 3:6:4 D. 6:4:3
12. F is directly proportional to A. If F = 42 when A= 6, then find the value of A when F = 140.
    A. 14.5 B. 20.0 C. 25.2 D. 26.4
13 Find the value of $(4x + 3y)$: $(6x + 7y)$, $if\ x$: y = 1: 4
    A. 6: 11 B. 8: 17 C. 5: 13 D. 4: 5
14. The ratio of the present age of A to that of B is 4: 7. After ten years, the ratio of the ages of A and B will be 3:4. What will be the ratio of age of A after five years to the present age of B?
    A. 12:7 B. 9:4 C. 13:14 D. 11:6
15. P varies directly with the square of Q when R is constant and inversely with R when Q is constant. When Q =6 and R = 3, then P = 24. Find P when Q = 8 and R = 4.
    A. 48 B. 24 C. 16 D. 32

Topic: SI & CI

1. A sum of Rs 12,500 amounts to Rs. 15,500 in the 4 years at the rate of simple interest. Find the rate percent
   A. 3% B. 4% C. 5% D. 6%
2. At what rate of compound interest per annum will a sum of Rs. 1200 become Rs. 1348.32 in 2 years?
   A. 6% B. 6.25% C. 6.5% D. 7%
3. The compound interest on Rs 15625 for $1\frac{1}{2}$ years at 8% per annum compounded half yearly is
   A. Rs. 1462 B. Rs 1951 C. 2621 D. Rs 3689
4. The compound interest on Rs 5000 at 8% per annum for 2 years, compounded annually is:
   A. Rs 800 B. Rs 825 C, Rs 832 D. Rs 850
5. Satish took a loan at 10% p.a. S.I. After 4 years, he returned the principal along with the interest. If he returns in all Rs. 3500, what is the principal amount?
   A. 2500 B. 3000 C. 3500 D. 4000
6. The sum that amounts to Rs 4913 in 3 years at $6\frac{1}{4}$% per annum compounded annually is
   A. Rs 3096 B. Rs 4076 C. Rs. 4085 D. Rs. 4096
7. The difference between the compound interest and simple interest on certain sum at 10% per annum for 2 years is Rs. 631. What is the sum?
   A. Rs. 63100 B. Rs. 56000 C. 42160 D. 68000
8. A sum of Rs 1000 was lent to two people, one at the rate 5% and the other at the rate of 8%. If the simple interest after one year is Rs. 62, find the sum lent at 8% interest rate
   A. Rs 300 B. RS 400 C. Rs. 500 D. Rs 600
9. A sum amount to Rs 1065 at simple interest rate of 7.5% per annum after 3 years. Find the sum
   A. Rs. 878.40 B. Rs. 869.38 C. Rs 869.28 D. Rs. 869.08
10. A man deposited Rs.40,000 in a bank at 10% per annum interest compounded yearly. Now after two years, the government comes out with a law that any annual interest greater than Rs.2500 will be taxed at the end of the year. Also, the rate of interest is decreased to 8%. How much should the man withdraw now so as, not to pay tax at the end of the year?
    A. 25000 B. 24000 C. 17150 D. 18150
11. Some amount out of Rs. 7,000 was lent at 6% per annum and the remaining at 4% per annum. If the total simple interest from both the fractions in 5 years was Rs. 1600, the sum lent at 6% per annum was:
    A. 2000 B. 2500 C. 3000 D. 3500
12. A certain sum becomes 8 times itself in 3 years under compound interest, interest being compounded annually. How many years would the sum takes to become 64 times itself?
    A. 4 years B. 5 years C. 6 years D. 8 years
13. The effective annual rate of interest corresponding to a nominal rate of 6% per annum payable half-yearly is:
    A. 6.0% B. 12 % C. 6.06% D. 6.09%
14. If the simple interest on a sum of money at 10% per annum for 3 years is Rs 1500, then the compound interest on the same sum, at the same rate for the same period of time is
    A. Rs 1655 B. RS 1155 C. Rs. 1555 D. Rs. 1855
15 Find the simple interest on Rs 7000 at 50/3 % for 9 months
    A. 765 B. 830 C. 735 D. 875

Topic: TIME & WORK

1. Pipe A and B can fill a tank in 15 minutes and 10 minutes respectively. Pipe C can empty the tank in 5 minutes. Pipe A and B are opened simultaneously and after 4 minute pipe C is also opened. In what time the tank will be emptied?
   A. 20 min B. 25 min C. 30 min D. 35 min
2. A can finish a work in 24 days. B in 9 days and C in 12 days. B and C start the work but are forced to leave after 3 days. The remaining work was done by A in:
   A. 5 days B. 6 days C. 8 days D. 10 days
3. Ajay and Bhanu can do a piece of work in 15 days and 9 days respectively. If Ajay works alternatively and Bhanu works daily, In how many days, the work will be completed?
   A. 3 days B. 6 days C. 7 days D. $7\frac{2}{3}$ days
4. A, B and C can do a piece of work in 19, 38 and 57 days respectively. In how many days can C do the work if he is assisted by A and B on every third day?
   A. 23 days B. $23\frac{5}{11}$days C. $23\frac{6}{11}$ days D. 24 days
5. Sunil can do a work in 18 days and Vinita can do the same in 27 days. With Rahul they can do the job in 9 days. So, Rahul can do the job in:
   A. 54 days B. 108 Days C. 60 days D. 45 days
6. A is four times as good a workman as B and, therefore, is able to finish a job in 54 days less than B. Working together, they can do it in:
   A. 14 days B. 14.2 days C. 14.4 days D. 14.8 days
7. P and Q can do a work in 18 days and 24 days respectively. They worked together for 8 days and then P left. The remaining work was finished by Q in
   A. 5 days B. $6\frac{1}{3}$ days C. $6\frac{1}{2}$ days D. $5\frac{1}{3}$ days
8. The number of days in which A and B together can finish a piece of work is 45 days less than the time taken by A alone and 20 days less than the time taken by B alone to finish the work. If A and B completed the work in 27 days with the help of C and got a total compensation of Rs 4500 for the work, then what is the share of C?
   A. Rs 450 B. Rs 400 C. Rs 500 D. Rs 200
9. On a certain day, Ram works at 11/7th of his usual rate of doing work and finished the work 28 minutes earlier than the usual time required. Had Ram worked at 7/11th of his usual rate of doing work then the time taken by him to complete the work would have been how much more than the usual time required?
   A. 44 min B. 53 min C. 63 min D. 70 min
10. A and B can do a work in 12 days, B and C can do the same work in 15 days, and C and A can do the same work in 20 days. A, B and C will complete the work together in:
   A. 5 days B. 8 days C. 9 days D. 10 days
11. Two pipes A and B can fill a tank in 24 minutes and 32 minutes respectively. If both the pipes are opened simultaneously, after how much time should B be closed so that the tank is full in 18 minutes?
   A. 2 min B. 4 min C. 6 min D. 8 min
12. A can complete a piece of work in 24 days, B in 40 days and C in 56 days. All the three began the work together but A left 2 days before the completion of the work and B left 4 days before the completion of work. Only C worked up to the end. In how many days was the work completed?
   A. 12 days B. 14 days C. 15 days D. 17 days
13. A pipe can fill a bucket in 5 hours but due to a hole at the bottom it takes 6 hours to fill the bucket. How much time will it take to empty the bucket if it was full?
   A. 25 hours B. 30 hours C. 35 hours D. 40 hours
14. 4 men work for 5 hours a day to finish 2 units of work, in 24 days. How many days will 6 men need to finish 3 units of work working 6 hours a day?
   A. 15 days B. 18 days C. 20 days D. 24 days

15. 15 men complete a work in 24 days while 12 women can complete it in 36 days. In how many days 12 Men with 18 Women can complete this work.

A. 40 days B. 20 days C. $13\frac{2}{3}$ days D. $13\frac{1}{3}$ dyas

16. If the efficiency relation for A, B & C is A= 2B = 3C And A, B & C can finish a piece of work in 24 days. Then in how many days B alone can do the same work.

A. 77 days B. 88 days C. 99 days D. 110 days

17. Vandana can do a piece of work in 55 days. Harshit is 50% more efficient than Vandana. The number of days taken by Harshit to do the same piece of work is:

A. $36\frac{2}{3}$ days B. $36\frac{5}{6}$ days C. $35\frac{5}{6}$ days D. $35\frac{2}{3}$ days

18. Two pipes A and B can fill a cistern in 4 hrs. Had they been opened separately, then B would have taken 6 hrs more than A to fill the cistern. How much time will be taken by A to fill the cistern separately?

A. 2 hours B. 4 hours C. 6 Hours D. 8 hours

19. Two pipes A and B can fill a tank in 36 minutes and 45 minutes, another pipes C can empty the tank in 30 minutes. Pipes A and B are opened first and then 7 minutes later pipes C is also opened. Find the time taken to fill the tank.

A. 40 min B. 42 min C. 44 min D. 46 min

20. A can plough a farm in same time as B and C together can do it. If A and B together do the same in 20 days and C in 100 days then B could do it alone in:

A. 50 days B. 25 days C. 75 days D. 65 days

Topic: Time Speed & Distance

1. In a 300 metres race A beats B by 45 m or 9 seconds. A's time over the course is:
   A. 60 Seconds B. 51 Seconds C. 40 Seconds D. 69 Seconds
2. Jethalal covers 15 kms at the speed of 20 kmph and other 5 kms at the speed of 2.5 kmph. What is his average speed throughout this journey?
   A. 8 kmph B. 80/11 kmph C. 12 Kmph D. 10 kmph
3. 300 meter long train crosses a platform in 39 seconds while it crosses a signal pole in 18 seconds. What is the length of the platform?
   A. 300m B. 400 m C. 450 m D. 350 m
4. A boat can travel with a speed of 15 km/hr in still water. If the speed of the stream is 4 km/hr, find the time taken by the boat to go 57 km downstream.
   A, 3 hours B. 4 hours C. 5 hours D. 6 hours
5. What will be the distance between Chennai and Goa? I took one hour more, when I travel at 80 kmph than at 90 kmph.
   A. 600km B. 700 km C. 720 km D. 740 km
6. At his usual rowing rate, Rahul can travel 12 miles downstream in a certain river in 6 hours less than it takes him to travel the same distance upstream. But if he could double his usual rowing rate for his 24 mile round trip, the downstream 12 miles would then take only one hour less than the upstream 12 miles. What is the speed of the current in miles per hour?
   A. $1\frac{2}{3}\ kmph$ B. $2\frac{2}{3}\ kmph$ C. $3\frac{2}{3}\ kmph$ D. $4\frac{2}{3}\ kmph$
7. A boat covers a certain distance downstream in 1 hour, while it comes back in 1 1⁄2 hours. If the speed of the stream be 3 kmph, what is the speed of the boat in still water?
   A. 12 kmph B. 13 kmph C. 14 kmph D. 15 kmph
8. In one hour, a boat goes 13 km/hr along the stream and 6 km/hr against the stream. The speed of the boat in still water (in km/hr) is:
   A. 9.5 kmph B. 19 kmph C. 13 kmph D. 10 kmph
9. In covering a distance of 30 km, Akshay takes 2 hours more than Bhanu. If Akshay doubles his speed, then he would take 1 hour less than Bhanu. Akshay's speed is:
   A. 6 kmph B. 8 kmph C. 9 kmph D. 5 kmph
10. In a 100 m race, A can beat B by 20 m and B can beat C by 5 m. In the same race, A can beat C by:
    A. 21 m B. 22 m C. 23 m D 24 m
11. Two trains are running at 60 km/hr and 30 km/hr respectively in the same direction. The faster train completely passes a man sitting in the slower train in 60 seconds. What is the length of the fast train?
    A. 300 m B. 400 m C. 450 m D. 500 m
12 A car starts from Hyderabad and moves towards Bangalore and at the same time, another car starts from Bangalore and moves towards Hyderabad. After crossing each other, they take 361 and 400 mins respectively to reach their destinations. What will be the speed of the first car, if the speed of the second car is 76 kmph?
    A. 66 kmph B. 80 kmph C. 88 kmph D. 100 kmph
13. A can run 30 m while B runs 33 m. In a 1.1 km race B beats A by:
    A. 80 meter B. 90 meter C. 100 meter D. 110 meter
14. There are 30 windmills with a constant distance between each pole. A car takes 38 seconds to reach the 20th pole. How much time will it take to reach the last pole?
    A. 58 sec B. 59 Sec C. 60 sec D. 57 seconds
15. Two trains running in opposite directions cross a man standing on the platform in 27 seconds and 17 seconds respectively and they cross each other in 23 seconds. The ratio of their speeds is:
    A. 1:2 B. 2;3 C 3:2 D 2:1
16. A man covers the first half of the journey at the speed of 65 kmph and the remaining at the speed of 35 kmph. Find his average speed?

A. 45 kmph B. 55 kmph C. 50 kmph D. 45.5 kmph

17 In a 500 m race, the ratio of the speeds of two contestants A and B is 3 : 4. A has a start of 140 m. Then, A wins by:

A. 10 m B. 20 m C. 30 m D. 40 m

18. Each day a man meets his wife at the train station after work, and then she drives him home. She always arrives exactly on time to pick him up. One day he catches an earlier train and arrives at the station an hour early. He immediately begins walking home along the same route the wife drives. Eventually his wife sees him on her way to the station and drives him the rest of the way home. When they arrive home, the man notices that they arrived 30 minutes earlier than usual. How much time did the man spend walking?

A. 15 min B. 30 min C. 45 min D. 50 min

19. A train running at 7/11 of its own speed reached a place in 22 hrs. how much time can be saved if train would run at its own speed ?

A. 12 hour B. 10 hours C. 14 hours D. 16 hours

20. A boat running downstream covers a distance of 40 km in 5 hours while for covering the same distance upstream, it takes 10 hours. What is the speed of the boat in still water?

A. 4 kmph B. 5 kmph C. 6 kmph D. 8 kmph
